

## Carrot top experiment

What do you need for your carrot top to grow?

Which carrot top do you think will grow tallest?

How tall do you think it will grow?

**If you are feeling adventurous you could plant a lemon seed, you could let us know next term how you get on!**

- Cut open a lemon from the shop and get out the seeds.
- Wrap in moist kitchen roll for 10 days.
- After 10 days check seeds to see if their sprouting.

- Fill a small pot with compost.
- Use a pencil or your finger to make a hole in the compost.
- Place the seed in the hole and water.
- Place your pot on a warm window ledge and watch it grow.
- Don't forget to keep it watered.
